

OCEAN ROVER CRUISES

SAT-COM POLICY

Ocean Rover is equipped with satellite communication equipment for voice and data transmission. This equipment is *primarily* for emergency and logistical communication between the vessel and our headquarters.

Of course, our passengers can be reached by email. Also, passengers on board Ocean Rover can contact their families or offices via phone or email.

Emails to Ocean Rover passengers should be directed to: info@ocean-rover.com (NO attachments, plain text messages only please). Our office staff will then forward the message to the vessel.

Due to the high costs of satellite communication we are obliged to charge our passengers for this service as follows:

- Email in: \$5,- per message
- Email out: \$5,- per message
- Phone calls: \$5,- per minute or each part of one minute.
